

Watershed Rehabilitation Status December 2020

2020 Activities

\$10.0 million in discretionary funding and \$25 million was received through Farm Bill annual funding for rehabilitation. The \$10.0 million in discretionary funding is a continuance of the typical annual investment in the watershed rehabilitation program, which recognizes the critical role of these watershed structures in flood management, water supply, erosion control, agricultural productivity, recreation and wildlife habitat. This funding helps to repair aging infrastructure, create jobs and commerce, and protect homes and lives.

Projects ready for construction and design received priority for funding in 2020. Sixteen dams in 6 states were funded \$4.9 million for design; 14 dams in 6 states were funded \$14.6 million for construction; and 25 dams in 18 states were funded \$10.4 million to develop watershed plans.

NRCS continued to provide funding for assessments of high-hazard dams. NRCS provided \$1.2 million to fund assessments for 51 dams in 6 states. To date, 1,632 dam assessments are completed in 43 states.

On-hold: Dams where the sponsor did not have funds for their share of the cost or where land rights have not been obtained.

Plan Implem.: Plan is authorized, and the project is ready for or is being designed or is under construction.

* Funded with CCC funds authorized in the 2014 Farm Bill and FY 2015 Appropriations Act. There are multiple dams in some lines. These dams are in the same watershed, same county, and have the same status: Example: WV Brush Creek 9; 14; 15.
